

Please do not weaken our State's "Do Not Call" laws in any way. I believe you will find that that the majority of our citizens do NOT want to be harassed by telemarketers. It's bad enough we have to put up with hundreds of non-profit agencies begging for our money, without having someone else annoying the hell out of us with their boring dribble that no one is interested in anyway. That's why 80% of our state's citizens signed up for the "Do Not Call" lists in the first place. Last time I checked, this was a Democracy, which should mean that the majority should rule. Don't let a small few ruin the lives of the majority. Thank you.
